ACTUAL ENVIRONMENTAL PROBLEMS

Proceedings of the XI International
Scientific Conference of young scientists,
graduates, master and PhD students

December 2–3, 2021
Minsk, Republic of Belarus

Minsk, 2021

The general editorship:

Doctor of Sciences in Physics and Mathematics,
Professor Sergei Maskevich
Candidate of Technical Sciences, Associate professor
Maria Germenchuk

Reviewers:

Anatoly Batyan, Sergei Golovatiy, Victoria Luchina

The conference proceedings include the theses submitted at the XIth International scientific conference of young scientists, PhD students, Master`s degree students, and students «Actual environmental problems» in English, which was held in December 2–3, 2021 at the International Sakharov Environmental Institute of Belarusian State University.

The proceedings are referred to a wide range of expert, lecturers of higher and secondary educational establishments, PhD students, Master`s degree students and students.

The conference proceedings are published with the financial and information support
of the Ministry of Education of the Republic of Belarus
and with the financial support of the UNESCO National Project
«School-laboratory for pupils is the instrument for implementing the agenda 2030 in the Republic of Belarus»

EVALUATION OF BY-PRODUCTS THAT CAUSE ENVIRONMENTAL PROBLEMS IN OLIVE OIL PRODUCTION

Mehmet Musa Özcan¹, V. Lemiasheuski²

Minsk, Republic of Belarus

mozcan@selcuk.edu.tr

In olive production, which has a very important place in the country's economy, in addition to main products such as olive oil and table olives and olive oil, solid and liquid by-products such as "Pirina" and "Blackwater" are formed in olive oil factories. Against pomace, which can be evaluated economically, black water is left indiscriminately to the environment. Most of the wastes that occur on average as 200 billion tons each year are either left to nature as garbage or used as fuel, animal feed or fertilizer with a little processing. Environmental pollution that appears with increasing industrialization and population, and the economic consumption used to eliminate pollution cause wastes to become a biomass problem.

Keywords: olive, processing, olive by-products, waste, blackwater, prina (pomace).

It is obtained by mechanical means from the fruits of the evergreen tree *Olea europaea*. The food industry has a wide working area and high production capacity in terms of raw material sources used. As a result of production, high amounts and various types of waste are generated. Creating a waste awareness for this sector will also contribute to our country economically. Waste biomass, which can be considered as a renewable energy source, has become an increasingly important field of scientific study and industrial application in terms of environmental and economic reasons, as well as the recovery of waste, useful, cheap, new, high value-added and natural products. Olive black water; contains sugars, organic acids, polyalcohols, pectins, colloids, tannins and lipids. Valuable products can be produced by biotechnological transformation from solid and liquid wastes from the olive oil industry. In order to determine the wastes of the olive and olive oil processing industry and alternative evaluation methods, first of all, olive, olive oil and its compositions should be examined, and then the wastes generated in the production technology should be investigated in detail.

a. Fleshy part (Mesocarp): It makes up 65–83 % of the grain. It contains water, oil, sugar, polysaccharides, protein, pectin, organic acid, tannin, oleuropein, color and mineral substances. The fleshy part contains 50–60 % water, 15–30 % oil, 2–5 % nitrogenous substances, 3–7.5 % sugar, 3–6 % cellulose, 1–2 % minerals, 2–2.25 % phenols.

b. Seed: In this part of the grain, there are 30 % water, 27.3 % oil, 10.2% nitrogenous substances, 26.9 % sugar, 1.9 % cellulose, 1.5 % minerals, 0.5 % polyphenols.

c. Core (Endocarp): It makes up 13–30 % of the grain. The kernel consists of the kernel shell and the seed inside. In the core part, there are 9.3 % water, 0.7 % oil, 3.4 % nitrogenous substances, 41 % sugar, 38 % cellulose, 4.1 % minerals, 0.1 % polyphenols.

In the composition of the olive fruit, besides phosphorus, potassium, calcium and magnesium elements, there are vitamins A (retinol), which plays an important role in vision, E (tocopherol), which is one of the natural antioxidants, K (naphtaquinone), which is a coagulation factor, and D (cholecalciferol), which prevents rickets.

Alternative Uses of Wastes from Olive Oil Production. When we classify the studies carried out to evaluate the waste products generated in olive oil production in the world, according to their fields; alternative energy production (biodiesel, biogas, bioethanol, biohydrogen, pellet), livestock (feed) and agricultural applications (soil conditioner), food (gelling, functional foods), pharmaceuticals, nutraceuticals, cosmetics (preservatives, natural humectants) applications, and we encounter biotechnological applications such as bioplastic/biopolymer, biological surfactant and lipase production.

Phenolic substances (1–3 % by weight) are at the top of the bioactive substances in olives. More than 36 phenolic compounds have been identified in olive oil. The antimicrobial, antioxidant and anti-inflammatory effects of olive oil phenolic compounds have been demonstrated in many studies.

The use of olive black water in animal nutrition. At the end of olive oil production, a serious level of olive waste water (black water) is formed. It can be used in blackwater animals by concentrating or drying.

The use of pomace in animal feeding. Factors such as the method used in olive oil production, the geographical condition of the region where the olives are obtained, the harvest period and the separation of the seed from the olive pomace affect the chemical composition of the olive pomace. These situations affect its use in animal nutrition. In order to produce animal feed additives from raw pomace, the very high acidity of the pomace

must be adjusted and its oil must be removed. The main reason why it is preferred as animal feed is that it is cheap. However, the biggest disadvantage is that it is poor in protein and contains a high amount of cellulose.

Use of pomace for fertilization purposes. The most important benefit of this method is to bring the high amount of nutritive components carried by the waste to the soil naturally. Raw pomace (50 % moisture) contains nitrogen (0.96 %), phosphorus (0.56 %) and total organic carbon (60.45 %). These components are added to the soil with the humus-like product obtained from the enrichment of pomace by fermentation in an airless environment.

Use of olive black water for fertilization. When olive oil waste water is used directly as organic fertilizer, it has negative effects on plants and soil properties. Treatment of these wastes is necessary to produce a stable and easily manageable end product. Composting is a widely used treatment for the treatment of organic waste. To dispose of olive oil waste water, composting olive oil waste water is an economically and ecologically accepted method. In this way, black water can be used as organic fertilizer without any phytotoxic effect.

The use of pomace in the production of phenolic compounds. Pomace; It is very rich in oleuropein, hydroxytyrosol, tyrosol, phenolic acid and flavonoid content. Approximately 0.27–0.29 g of polyphenols (oleuropein, hydroxytyrosol, tyrosol and tocopherol) and flavonoids (apigenin, quercetin, luteolin etc.) 70.0–79.3 g of cellulose; 3.54–4.75 g of ash; There are 107.1–195.4 mg of polyalcohol (mannitol). It is also very important that it is a natural and cheap resource.

Production of pectin and polyphenol from black water and olive pomace. The oil and water contained in the waste are separated by the pre-treatments carried out by centrifugation and evaporation.

Production of tyrosol and hydroxytyrosol from Blackwater. Microfiltration (MF), ultrafiltration (UF), nanofiltration (NF) in addition to column chromatography for the production of tyrosol and hydroxytyrosol from black water in a 2009 patented study for use in dermocosmetic products (milk, gel, cream), nutraceuticals and beverage-based diet mixtures. Purification was made with reverse osmosis (RO) membrane systems, and water was recycled by spray drying.

SECTION 3

PROBLEMS OF MODERN ENVIRONMENTAL SAFETY

(BIOMONITORING, BIOINDICATION, BIOREMEDIACTION, RADIOECOLOGY AND RADIATION SAFETY, ENVIRONMENTAL MONITORING, MANAGEMENT AND AUDIT. INFORMATION SYSTEMS AND TECHNOLOGIES IN ECOLOGY)

LAND DEGRADATION IS A SERIOUS ECONOMIC AND ENVIRONMENTAL PROBLEM	165
<i>M. Abdurakhmanova</i>	
EFFECTS OF DRYING PROCESS ON BIOLOGICAL PROPERTIES OF SOILS	166
<i>T. Abdurakhmonov, M. Karimboeva</i>	
ECOLOGICAL, PHARMACOLOGICAL AND BIOCHEMICAL ASSESSMENT OF THE FRUITS OF CLOUDBERRY SQUAT (RUBUS CHAMAEMORUS L.) OF NORTHERN BELARUS	168
<i>E. Akshevskaya, A. Kozorez</i>	
ENVIRONMENTAL DIRECTION OF THE "A1" ENTERPRISE.....	169
<i>M. Artemchuk, V. Krasovsky, P. Krishchanovich</i>	
THE PROBLEMS OF ECOLOGICAL SAFETY IN REPUBLIC OF ARMENIA IN RECENT DISTILLATES AND THEIR IMPACT ON CHILD MORBIDITY	170
<i>T. M. Astabatsyan</i>	
ANALYSIS OF THE HANDLING OF CONTAMINATED TEXTILES IN THE REPUBLIC OF BELARUS....	171
<i>E. Baeva, V. Misiuchenka</i>	
CURRENT TRENDS IN THE GENERATION OF INDUSTRIAL WASTE AND WASTE MANAGEMENT AT THE ENTERPRISE «TREPLAST»	172
<i>K. Baradynich, A. Fralou</i>	
VARIABILITY OF CERTAIN TRAITS UNDER THE INFLUENCE OF ELECTROMAGNETIC IMPULSES TO THE VEGETATIVE ORGAN OF CULTIVARS AND LINE PLANTS DEVELOPED IN CONDITIONS OF WATER SCARCITY	173
<i>A. Bekmukhamedov, A. Khasanova, N. Khusanov</i>	
INHERITANCE OF FIBER OUTPUT IN COTTON HYBRIDS.....	174
<i>S. Boboyev, M. Mirakhmedov, G. Narkizilova, J. Ruziev</i>	
SUMMER POPULATION OF VRANOVY BIRDS IN BORISOV	175
<i>M. Bogachova, A. Khandohiy, Y. Kisialiova</i>	
MODERN PROBLEMS OF MORPHOMETRIC ANALYSIS	176
<i>N. Bushkevich</i>	
LICHENOINDICATION OF AIR POLLUTION OF M. Ya. PAVLOV'S PARK	177
<i>S. Chadovich, I. Lapshevich, A. Titov, A. Lunovich, Y. Zhyltsova</i>	
THE IMPACT OF FOOD WASTE ON THE ENVIRONMENT	178
<i>D. Churakova, L. Kuzina</i>	
ANALYSIS OF THE SPECTRAL REFLECTIVITY OF AGRICULTURAL VEGETATION	179
<i>Y. Davidovich</i>	
ASSESSMENT OF THE ECOLOGICAL STATE OF TREE PLANTS OF PAVLOV PARK	180
<i>U. Dubatoyka, E. Zhuk</i>	
IMPLEMENTATION OF THE STOCKHOLM CONVENTION ON PERSISTENT ORGANIC POLLUTANTS IN THE REPUBLIC OF BELARUS	180
<i>V. Duzinchuk, S. Golovatyi</i>	

ANALYSIS OF THE POSSIBILITIES OF RECYCLING DISUSED FURNITURE IN THE REPUBLIC OF BELARUS.....	181
<i>P. Dzelianko, V. Misiuchenka</i>	
ANALYSIS OF THE TREATMENT OF CULLET IN THE REPUBLIC OF BELARUS	183
<i>M. Evsievich, V. Misyuchenko</i>	
EFFECT OF BIOSOLVENT DRUGS ON THE WASHING EFFECTIVENESS OF SALTS IN ALLUVIAL SOILS WITH DIFFERENT SALT	184
<i>M. Fakhrutdinova, O. Imomov</i>	
INFLUENCE OF MOLD FUNGI OF THE GENUS <i>ASPERGILLUS</i> ON A NATURAL CELLULOSE POLYMER IN MACROVISUAL OBSERVATION.....	185
<i>L. Gavriluyk, N. Ikonnikova</i>	
IFFERENCES IN THE VERBAL DEFINITION OF THE CHARACTERISTICS OF THE ECOLOGICAL QUALITY OF PRODUCTS IN SOME LANGUAGES AS A BASIS FOR THE UNIFICATION OF THEIR ENVIRONMENTAL LABELING.....	186
<i>V. Gudovich, A. Fralou</i>	
Natural analogues in physics and mechanics.....	187
<i>D. Ignatovskiy, V. Krasovskiy</i>	
ADVANTAGES OF PHITOREMEDICATION CLEANSING SOILS CONTAMINATED WITH HEAVY METALS	188
<i>Z. Jabbarov, N. Sultonova</i>	
FEATURES OF RADIAL DISTRIBUTION OF NICKEL IN FOREST SOILS IN ZONES OF INFLUENCE OF ELECTRICAL PRODUCTION	189
<i>P. Kachanovich</i>	
AGRICULTURAL CROPS IN THE STRUCTURE OF THE DIET OF RESOURCE ANIMAL SPECIES IN BELARUS.....	190
<i>A. Kapskaya, Yu. Lyakh, M. Lezhdey</i>	
COMPREHENSIVE EVALUATION AND OPTIMIZATION OF ECOLOGICAL TRANSFORMATION OF COAL MINING SUBSIDENCE LAND – A CASE STUDY OF PAN'AN LAKE URBAN WETLAND PARK IN XUZHOU	191
<i>Ju. Kechun</i>	
COMPARATIVE ANALYSIS OF METHODS FOR CALCULATING STATIONARY RADIATION PROTECTION APPLIED TO PREMISES FOR RADIATION THERAPY.....	192
<i>E. Kemesh, E. Preobrazhenskaya, M. Piatkevich</i>	
STUDY OF THE PROPAGATION OF CILIATE BANANA-EATEN GECKOS IN THE MINSK ZOO	193
<i>N. Kovalchuk, I. Khandoziy</i>	
COMMITMENT TO THE ALARA CONCEPT AT THE BELARUSIAN NUCLEAR POWER PLANT AS ONE OF THE KEY FACTORS IN PROVIDING THE RADIATION SAFETY OF PERSONNEL	194
<i>V. Kutas</i>	
TROPHIC STRUCTURE IN THE HYDROGEN SULFIDE LAKE BARKOVSHCHINA	195
<i>I. Lapuka</i>	
MONITORING OF SARCOCYSTOSIS AMONG HUNTING SPECIES OF WATERING BIRDS OF MINSK REGION	197
<i>S. Latushko, Yu. Lyakh</i>	
ANALYSIS OF THE INITIAL MATERIALS FOR THE "ENVIRONMENTAL PROTECTION" SECTION OF THE FLAX FIBER BLEACHING WORKSHOP RECONSTRUCTION PROJECT	198
<i>V. Lesik, V. Misyuchenko</i>	
ECONOMIC POTENTIAL OF WIND POWER INDUSTRY IN BELARUS.....	199
<i>L. Lipnitski, M. Treyvas, E. Cherevan</i>	
THE NEED TO DEVELOP MEASURES FOR ENERGY SAVING AND IMPROVING ENERGY EFFICIENCY IN HEALTHCARE INSTITUTIONS	200
<i>L. Lipnitski, A. Kutas, K. Solenok</i>	
URBAN AIR POLLUTION AND ITS COUNTERMEASURES IN HEBEI, CHINA	201
<i>Liu Jiu'an, V. Lemiasheuski, Mehmet Musa Özcan</i>	

STORMWATER RUNOFF POLLUTION CONTROL – THE COMPREHENSIVE IMPROVEMENT PROJECT OF WATER ENVIRONMENT IN ZHANGJIAKOU CITY, HEBEI PROVINCE.....	202
<i>Liu Zhi gang, V. Lemiasheuski</i>	
PARASITIC NEMATODES LOCALIZED UNDER THE CUTICLE OF THE MUSCULAR STOMACH OF WILD AND DOMESTIC WATER BIRDS AND THEIR DIAGNOSTICS	204
<i>Yu. Lyakh, A. Bormotov</i>	
IXODIC TICKS IN THE RECREATIONAL ZONE OF MINSK AND THE ROLE OF HUMANS IN ENHANCING THEIR NEGATIVE INFLUENCE	205
<i>Yu. Lyakh, L. Isachenko</i>	
NATURAL RECREATIONAL POTENTIAL OF GOMEL REGION OF REPUBLIC OF BELARUS	206
<i>A. Makarenko</i>	
THE IMPACT OF THE THERMAL TREATMENT OF THE SUBSTRATE ON THE BIOLOGICAL EFFICIANCE OF GILLED MUSHROOMS (<i>PLEUROTUS OSTREATUS</i>).....	207
<i>A. Makas, G. Krusir</i>	
ANALYSIS OF BIOCHEMICAL PROPERTIES OF <i>BACILLUS CEREUS</i> PURE CULTURES UNDER PROLONGED EXPOSURE TO IONIZING RADIATION.....	208
<i>S. Maltsava, A. Yakubovich, E. Gritskevitch</i>	
INFLUENCE OF LOW-INTENSITY LASER RADIATION ON THE GROWTH OF PURE <i>BACILLUS SUBTILIS</i> CROPS ISOLATED FROM THE SOILS OF THE POLESYE STATE RADIATION AND ECOLOGICAL RESERVE	209
<i>E. Maslyukov, L. Gavriluyk, E. Gritskevich, A. Vabishchevich</i>	
ON A NATIONAL GLOSSARY OF NUCLEAR AND RADIATION SAFETY AS AN INSTRUMENT OF TERMINOLOGY HARMONIZATION	210
<i>K. Mazanik, T. Artsemyeva, N. Tushin, M. Michalevic</i>	
NANOSCALE PHOTOCATALYSTS BASED ON ZINC OXIDE (ZnO) FOR THE REMOVAL OF PHARMACOLOGICAL WASTE IN AQUEOUS MEDIA UNDER THE INFLUENCE OF ULTRAVIOLET RADIATION	211
<i>A. Miadzvetski, A. Shcherbovich, V. Plakhodzka, N. Savastenko, I. Filatova, V. Lushkevich, S. Maskevich</i>	
EVALUATION OF BY-PRODUCTS THAT CAUSE ENVIRONMENTAL PROBLEMS IN OLIVE OIL PRODUCTION.....	212
